

BT Graduation Bundle explanantion

Dear Building Technology graduate,

We are happy to see that you want to contribute to the BT-Bundle! Below you'll find more information about this book and how the participation works.

General

- Last years graduate or older generation BT student? Every BT-Alumni can contribute!
- Very old and out-dated graduation topic? Put it in!
- A hard copy BT-Bundle is only free for contributors and we will give it to you during the BT Alumni day. For others interested we ask an amount of 5 euro.

Template

- Attached to this email you'll find the InDesign template for the general layout of the book (IDML) and 3 Font files (OTF files), please install the OTF files.
- Please choose one of the three templates. To briefly describe your project, you roughly have 200 to 300 words.
- Have a look at the example projects (PDF) before filling in the template.
- Make sure you fill in your name, year of graduation, tutors, current employer and name of the graduation project.
- Make sure to use high quality images or scans. There is room for 2 to 4 small images and 1 large image, see the templates. Images can be photographs, schemes, details/drawings, sketches or anything that supports your text and explains your project.
- Only if you don't have enough images to fill up the left page of the template, you can make your text part a little longer to make the whole spread look better. Otherwise we kindly ask you to stick to the 200 to 300 words (left column only).
- As you can see there is a QR code in the template. You can use this to direct readers towards your portfolio. If you don't have a portfolio you are free to link towards your LinkedIn or towards your company page. Please add the link, to where you want your QR code to link to, in your submission email. We will make the QR code ourselves. Using the QR code is not obligatory.
- If you are not familiar with the InDesign software, you can send in a Microsoft Word file and the illustrations seperatly (JPEG, PNG, TIFF).

Submission

- Please submit your projects before 23-12-2016 to editor@praktijkverenigingbout.nl
- If you have any questions about the template, please contact editor@praktijkverenigingbout.nl
- If you have any questions about the event itself, please contact education@praktijkverenigingbout.nl

Finally

- BouT remains the right to make small alterations to the submission if the overall layout of the book/spread requires this.
- Due to limited time, a draft of the book will not be sent out to the contributors before printing.
- If the Alumni participation is low, we will cancel the BT-Bundle and contributors who already submitted will be notified.

We thank you in advance!

Kind regards,

Nick ten Caat - Event organisation & BouT board.
Allard Huitema - BT-Bundle & Rumoeur Committee.
